

asparagus fern

Known as asparagus fern for its feathery appearance, sprengeri are highly adaptable.

Place in bright, indirect to medium light. Tolerates low light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

Sprengeri and asparagus ferns are pet friendly!

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
