

# callisia

Members of this plant family are known as Roselings. They are aggressive growers with tiny leaves and a trailing habit.

---

Place in bright, indirect to medium light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

Prune on the regular to keep size and shape. Closely related to Tradescantia.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
