

chirita

This plant is a Genersid and belongs to the African Violet family.
The leaves are fuzzy and flowers bloom in an array of colors including blue, white, pink, green, or yellow

Chirita thrives in medium to bright, indirect light. Intense mid-day rays may cause undue stress.

Use an African violet specific fertilizer each time you water to promote flowering.

Use an African Violet specific potting mix rich in humus which retains moisture and locks in nutrients.

Chirita are a relatively slow growers. Their flower shape resembles those of Streptocarpus.

Bottom water when soil is slightly dry to the touch. Place plant in a shallow dish of room temperature water and allow to absorb for about 30 minutes. Plants in the violet family like humidity. Place plants close together (but not touching) to increase humidity.
