

# desert rose

Also known as Adenium, this plant has stunning flowers and is often grown as a bonsai thanks to its thick, succulent trunk.

---

Grow in bright light for best results.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Use a sharp, well-drained potting soil such as a Cactus specific mix. Your soil should take up water, but drain and dry quickly.

Wash thoroughly if the sap comes in contact with your skin. Keep plants out of reach of pets and children.

Thoroughly water when soil is almost completely dry. Water well, let drain, let dry in between watering, repeat.
