

# dieffenbachia

With large, colorful leaves, and an upright growth habit, this plant makes a statement. Larger plants take on interesting habits as they grow quick and quirky.

---

Place in bright, indirect to medium light.  
Tolerates low light.

Fertilize monthly with an all-purpose fertilizer or twice monthly to encourage faster growth especially during the growing season.

Plant in an all-purpose potting soil.

Dieffenbachia sap can irritate the skin and mouth and is considered mildly to moderately toxic. Keep away from pets and children.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
