

fittonia

Fittonia is commonly known as nerve plant because of its delicate venation.
Leaf color can vary from red, pink, or white with green veins.

Place in bright, indirect to medium light.
Avoid direct sunlight.

Feed weekly during periods of active growth; spring and summer.

Plant in all-purpose potting soil or step-up your game with a terrestrial mix; 2-3 parts all-purpose potting soil, 1 part vermiculite, 1/2 part worm castings.

Fittonia do great in terrariums and love high humidity!

Water when the top 1-2 inches of soil are dry. Fittonia do not like to dry out and will show it by dropping interior leaves.
