

jasmine

Jasmine give off a beautifully intense aroma when blooming.

Grow in bright light for best results. Full or part-sun is best when grown outdoors.

Fertilize during the growing season with an all-purpose fertilizer or bloom booster.

Plant in an all-purpose potting soil.

The white blooms of Jasmine are most fragrant and showy at night. They are a great plant for moon gardens.

Keep soil evenly moist, but not saturated. Cut back on watering after flowering is complete.
