

lemon cypress

Lemon Cypress add a stunning pop of color to any room, especially on bleak winter days.

Lemon Cypress prefer bright, indirect light. Place in front of a window for best expression of lime green foliage.

Plant in an all-purpose potting soil.

Lemon cypress require even moisture. If allowed to dry out, lemon cypress will crisp up quickly!

Fertilize at half-strength with an all purpose fertilizer during periods of active growth.

Brush the foliage to enjoy a lemony scent. Just be careful, Cypress do have tiny thorns.
