

medinilla

Medinilla is a statement plant with its beautiful foliage and stunning, pink, pendulous blooms.

Place in bright, indirect light. Sunshine will promote big, beautiful blooms!

Plant in all-purpose potting soil. Add 1 part orchid bark for ample drainage and aeration.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.

Fertilize during the growing season with an all-purpose fertilizer or bloom booster.

These plants will yield beautiful, draping flowers year-round if cared for properly.
