

money tree

Money Tree originates from tropical wetlands. It can handle all the love (watering) you have to give. This tree is said to bring good luck.

Place in bright, indirect to medium light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in all-purpose potting soil.

Check for water! This plant is exceptionally easy to grow, but drying out will make it grumpy in hurry. Plant Calathea or Baby Tears around the base of money tree as a decorative groundcover.

Money trees love water. Check soil moisture at least weekly. Water when top inch is dry.
