

norfolk island pine

These coniferous plants can be grown indoors year around and are often used as mini holiday tree. In their native habitat, they can grow up to 200 feet tall!

Place in bright, indirect to medium light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

To maintain the beautiful, natural symmetry, turn the plant every week or two to keep it growing evenly.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
