

# oxalis

Also known as the shamrock plant, Oxalis are a plant parent favorite.  
800 species of oxalis can be found all over the world.

---

Place in bright, indirect to medium light.

Plant in all-purpose potting soil or step-up your game with a terrestrial mix; 2-3 parts all-purpose potting soil, 1 part vermiculite, 1/2 part worm castings.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.

Fertilize every 2 weeks with an all-purpose fertilizer during active growth. Stop fertilizing when leaves drop and plant goes dormant.

When your oxalis becomes leggy, cut almost all the way back to encourage new, sturdy growth.
