

peperomia

Peperomia vary in leaf shape, form, and growth habit. With the same basic needs, care is easy no matter which variety you choose.

Place in bright, indirect to medium light.
Tolerates low light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

Peperomia are actually part of the pepper family. As a species, they are known to reduce formaldehyde in the air.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
