

# schefflera

Schefflera have long enjoyed popularity as an indoor plant dating back to Victorian Era.

---

Place in bright, indirect light.  
Tolerates medium light.

Schefflera are heavy feeders. Fertilize once per week with an all-purpose fertilizer during active growth, monthly during fall and winter.

Plant in an all-purpose potting soil.

Schefflera do not like cool drafts or blasts of hot air. Keep them happy with a consistent air temperature.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
