

sensitive plant

With the slightest touch, the sensitive plant will close it's leaves;
reducing the surface area exposed to predators.

Place in bright, indirect light. Tolerates medium light.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

Mimosa Pudica, are member of the pea family. You can harvest their seeds from tiny, pea-like pods!

Keep soil evenly moist, but not saturated. Do not allow to dry out completely.
