

sinningia

Sinningia are close relatives to African Violets and are members of the Gesneriaceae plant family.

Bright, indirect light is best. Sinningia will burn in intense sunlight. Turn a quarter turn each week to promote even growth.

Use an African Violet specific fertilizer each time you water to promote flowering.

Use an African Violet specific potting mix rich in humus which retains moisture and locks in nutrients.

Sinningia is native to Brazil and when grown as an indoor plant are known as the florist's Gloxinia.

Bottom water when soil is slightly dry to the touch. Place plant in a shallow dish of room temperature water and allow to absorb for about 30 minutes. Plants in the violet family like humidity. Place plants close together (but not touching) to increase humidity.
