

# spider plant

Easy and fun to grow, every home could use a spider plant.  
Spider plants are pet friendly.

---

Place in bright, indirect to medium light.  
Tolerates low light

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Plant in an all-purpose potting soil.

Spider plants propagate themselves by producing pups. Prune them off and plant in damp soil.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.
