

# strawberry begonia

Similar to strawberry plants, but not related, this begonia sends out runners and makes a great hanging plant.

---

Place in bright, indirect to medium light.

Fertilize monthly with an all-purpose fertilizer during active growth, lower strength and regularity in fall and winter months.

Plant in all-purpose potting soil or step-up your game with a terrestrial mix; 2-3 parts all-purpose potting soil, 1 part vermiculite, 1/2 part worm castings.

The variegated Strawberry Begonia is particularly interesting with bright pink, white, and green leaves.

Water thoroughly, let dry slightly between waterings. Better to under than over water.
