

syngonium

Syngonium are commonly referred to as Arrow Head and are available in many beautiful colors and a range of patterns.

Place in bright, indirect to medium light.

This Aroid likes a well-drained, all-purpose potting soil with added bark and perlite. Combine 1 part all-purpose potting soil, 1 part orchid bark, 1 part perlite, 1/2 part charcoal, 1/2 part worm castings.

Water when the top 2-3 inches of soil are dry. Cut back on watering in the winter to avoid root rot. Do not allow to completely dry out.

Fertilize every 2 weeks during active growth. Cut fertilizer strength and frequency in half October - March.

Syngonium tend to grow upwards and then flop. Providing the support of a moss pole can add to the aesthetic
